

THE SECURITY OF YOUR COMPANY'S PASSWORDS IS AT RISK

The balance between security and the need for employees to have access to company passwords has long been an issue for businesses. With our new Password Management solution, password frustration will be a thing of the past.

SECURELY STORE

Tired of seeing sticky notes all over computer monitors? With military grade protection and several hundred rounds of industry best encryption, your password data is kept safe from anyone who shouldn't have it.

SHARE PASSWORDS WITH YOUR TEAM

Let's face it, sometimes you need to share company passwords with several members of your team or within the same department. Don't worry about having to email or tell a password to anyone anymore and lose track of who knows it. Our solution allows you to easily and securely share passwords with those who need them.

ACCESS PASSWORDS ANYWHERE

Need to work on the go? No problem! Your Company Vault is easily accessible from anywhere that you have an internet connection.

TRACK & REPORT

89% of employees admitted to retaining access to at least one application after they left a company, with 49% of those actually logging into a former company account. At any time, an admin can determine who created, viewed, or edited a password and therefore take the appropriate password action when employee turnover occurs.
